

Remote (Off-Campus) Access to the Yaşar University

With the Remote Access service, Yaşar University staff (Academic and Administrative) can access our university systems from outside the campus.

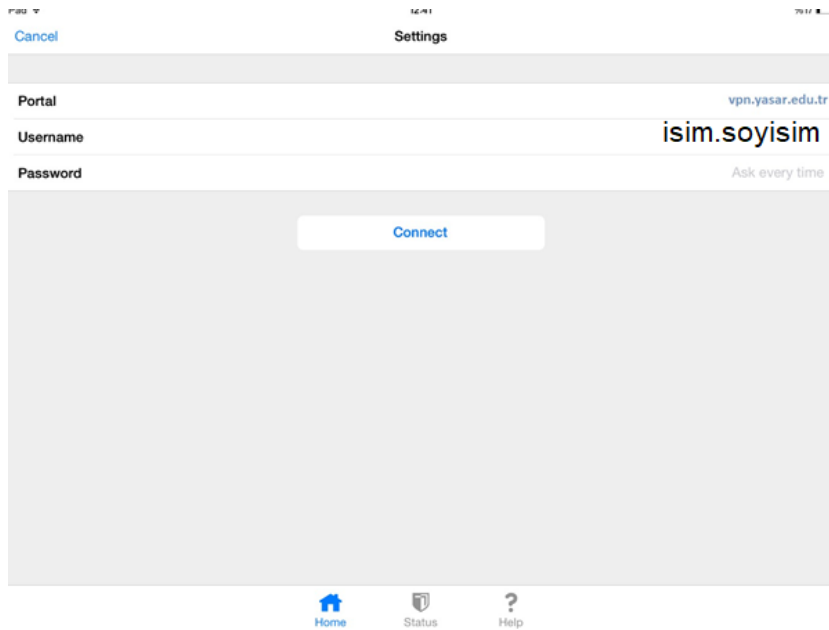

Program Installation for iPhone and iPad SSL VPN Remote Access

You may install the Global Protect application where is placed at the Apple Store into your tablets or phones by following the instructions that we indicated.

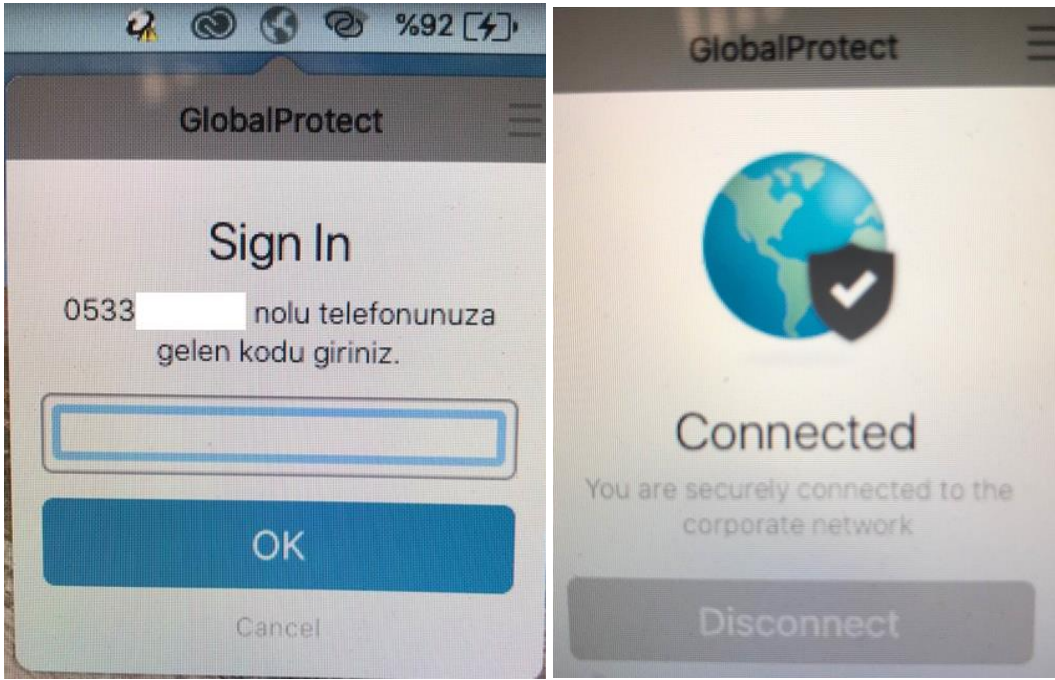

Please fill the portal info, your Username and Password where you will access at the "Settings" option.

For the portal information, please write vpn.yasar.edu.tr address.

You can connect the vpn.yasar.eu.tr portal via the Global Protect application that is being used for SSL VPN for identity authentication, and then sign in by using the authentication code that will be sent to your mobile phone number registered at the Directorate of Human Resources.

If your mobile phone number is not update, it will not be possible to access via VPN from outside the university.

Note: The VPN connection does not work while university is connected to wired / wireless networks.
