

Yaşar University Distance (Off-Campus) VPN Access

The Remote Access service provided by Yaşar University allows its staff members (academic and administrative) to have off-campus access.

Used for remote access, Global Protect software is readily installed on the corporate computers that are currently in use. When connecting for the first time, please enter vpn.yasar.edu.tr for the portal information if the software instructs you to do so. Only corporate computers will allow you to access the file servers. You can make use of the below-mentioned setup instructions on the computers where it is not installed. (Please check out page 3 for account settings to connect on computers that already have the software)

You can download the VPN software (Global Protect) compatible with the operating system that you are using by connecting with the system using your e-mail username and password via <https://vpn.yasar.edu.tr> without any connection with the university's wired/wireless network. It is enough to install the software on your computer just for once.

The setup steps to be followed after running the setup file that you have downloaded on your computer are as follows:

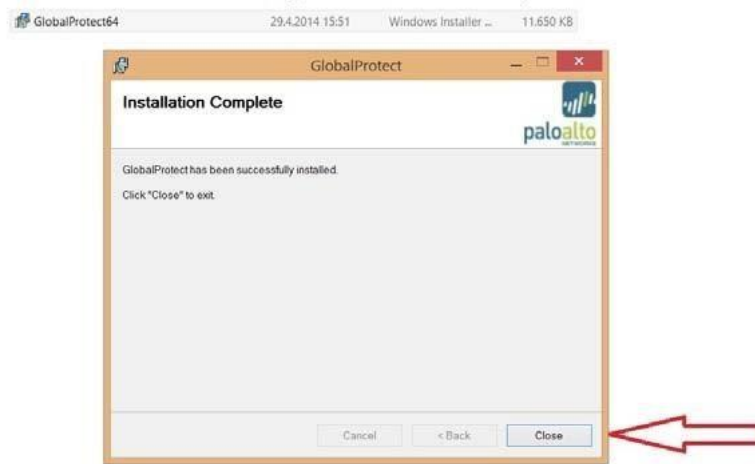

Select installation folder for installing the software:

Setup confirmation:

Installation complete

Please insert vpn.yasar.edu.tr as portal information when you start running **Global Protect** after completing the installment on your computer.

Insert your corporate username and password.

GlobalProtect

Sign In

Enter login credentials

Portal: vpn.yasar.edu.tr

Cancel

An extra security layer for your Yaşar University SSL VPN identification, two-factor authentication is in place to make sure that your account is not accessed by anyone who knows your password but only by you.

You can connect the vpn.yasar.eu.tr portal via the Global Protect application that is being used for SSL VPN for identity authentication, and then sign in by using the authentication code that will be sent to your mobile phone number registered at the Directorate of Human Resources.

If your mobile phone number is not update, it will not be possible to access via VPN from outside the university.

You can now access the file servers on your corporate computer once the connection is confirmed.

Global Protect will be seen on the taskbar when it starts running.

You can start/stop the program using the Connect/Disconnect options if you click right on the software icon.
